

**Amendments to the Abstract:**

Please replace the Abstract with the following amended Abstract:

A packaging having a box, and a cover sheet made of a material that is not permeable to decontamination gas. The cover sheet has a window closed by a piece of selectively impervious material. A flexible piece of a material that is not permeable to a decontamination gas is fixed to the cover sheet by at least one of its edges and has a free part which is able to move between a diffusion position and a non-diffusion position.
